AMBITTM INTERNAL CLADDING HEAD

Precision in Hard-to- Reach Areas

For complex molds and tight spaces.

Description

The AMBITTM Internal Cladding Head enhances your CNC machine or other motion platform with advanced internal metal deposition, featuring:

- Precise deposition in hard-to-reach areas, optimized for spaces less than 2 inches in diameter
- Optimized for corners, vertical walls, and blind features.
 - Seamless integration with AMBITTM hybrid systems or independent use, with automatic tool change in seconds for increased efficiency.
 - High-quality, precise deposition that improves mold durability and reduces downtime.

Optimized for spaces
less than 2 inches
in diameter.
